

Policy Brief Proposal

Data Visualization Using R
Spring 2018
Leah Brooks

Due Monday February 5
In class, on paper

To make sure that your project is on track, submit a one page proposal in which you outline what you are planning to do for this policy brief.

Recall that the mandate for this assignment is to

- write a 5 to 10 page brief
- with 5 to 8 graphics
- that either
 - improves an existing product
 - or creates a new product
- make visualizations should be in R,
- make the entire final product in R Markdown
- engage with a community partner

If you are planning to re-do an existing product, give me a copy of that as well.

Write me what you are planning to do and with whom (if anyone) you are planning to work.

If you would like to work with new data (encouraged!), be sure to identify the data and convince me that they include the information you'd like to analyze.
