# Lecture 2: <br> When You Need Graphs and <br> How We See Graphs and Merging 

January 30, 2023

## Course Administration

1. Any trouble submitting tutorials? questions?
2. Questions/issues with readings?
3. Make sure you're signed up for Piazza - email me if you are not

## Course Administration

1. Any trouble submitting tutorials? questions?
2. Questions/issues with readings?
3. Make sure you're signed up for Piazza - email me if you are not
4. Be sure to check online listing for good/bad/ugly: linked at bottom of lectures page

- I moved a few of you around to even up finders and commenters
- If date is not ok, try to switch with a classmate
- If you didn't sign up, sign up and let me know

## Course Administration

1. Any trouble submitting tutorials? questions?
2. Questions/issues with readings?
3. Make sure you're signed up for Piazza - email me if you are not
4. Be sure to check online listing for good/bad/ugly: linked at bottom of lectures page

- I moved a few of you around to even up finders and commenters
- If date is not ok, try to switch with a classmate
- If you didn't sign up, sign up and let me know

5. One-page proposal is due next week
6. Anything else?

## Next Week's Good Bad and Ugly

Finders, post link Wed. by noon.

|  | Finder | Commenter |
| :---: | :--- | :--- |
| 1 | Henry | Lancy |

Email me ASAP if you're not on the google sheet. Link at the bottom of the lectures tab.

## Few:

Visual Perception and Graphical Communication

## When Should You Use Tables vs. Graphs?

- Tables are for when
- you care about the actual numbers
- you have very few numbers

## When Should You Use Tables vs. Graphs?

- Tables are for when
- you care about the actual numbers
- you have very few numbers
- Graphs are for when
- you care about trends or general tendencies
- you have more numbers than a table can support
- the exact values are not critical
- you wish to highlight a particular relationship

## Starting with the Table

Job Satisfaction By Income, Education, and Age

| Income | Under 50 | 50 \& over | Under 50 | 50 \& over |
| :--- | ---: | ---: | ---: | ---: |
| Up to $\$ 50,000$ | 643 | 793 | 590 | 724 |
| Over $\$ 50,000$ | 735 | 928 | 863 | 662 |

Few, Chapter 3, Figure 3.13

## Version One of a Set of Numbers

## Version One of a Set of Numbers

What do you think the point of this picture is?
Few, Chapter 3, Figure 3.15

## Version Two of the Same Set of Numbers

## Version Two of the Same Set of Numbers

And the point of this picture?

## Choose the Graph that Leads the Reader to Your Answer

## Few Chapter 5: Drawing Attention

1. working memory
2. preattentive processing

- form
- color
- spatial position

3. applying to design
4. gestalt principles of visual perception

## Working Memory

We don't have much of it

## Working Memory

We don't have much of it

- people can remember 3 to 4 visual encodings for a chart
- therefore, more than about 4 colors as identification are distracting
- good visuals can stick in long-term memory

## Preattentive Processing

Why is this so important? Find the 5 s .
48921652097520589

## Preattentive Processing

Why is this so important? Find the 5 s.
48921652097520589
And now find the 5 s .

$$
489216 \mathbf{5} 2097 \mathbf{5} 20 \mathbf{5} 89
$$

## Preattentive Processing

Why is this so important? Find the 5 s.
48921652097520589
And now find the 5 s .

$$
489216 \mathbf{5} 2097 \mathbf{5} 20589
$$

Use preattentive processing to point out what you think is important.

# Preattentive Processing 

Form<br>Color<br>Spatial Position

Form

But Beware of 2-D Size

Why?

## But Beware of 2-D Size

## Why?

- People have a very hard time judging the relative size of 2-D objects
- Changing both length and width is a 2-D change
- Avoid unless you have a specific reason to do this - maybe you're drawing building sizes

## But Beware of 2-D Size

## Why?

- People have a very hard time judging the relative size of 2-D objects
- Changing both length and width is a 2-D change
- Avoid unless you have a specific reason to do this - maybe you're drawing building sizes

How much bigger is the small circle than the larger one?

## But Beware of 2-D Size

## Why?

- People have a very hard time judging the relative size of 2-D objects
- Changing both length and width is a 2-D change
- Avoid unless you have a specific reason to do this - maybe you're drawing building sizes

How much bigger is the small circle than the larger one? $16 x$

## Color

1. Hue

- What you think of as "color"
- Blue, Green, etc

2. Saturation

- full color to white

3. Lightness

- or brightness, full color to dark

## Color

1. Hue

- What you think of as "color"
- Blue, Green, etc

2. Saturation

- full color to white

3. Lightness

- or brightness, full color to dark

Contrasting hues stand out. Intense colors stand out.

## Using Color and Enclosure to Distinguish

- Quickly pick out two types
- Locate within larger block

Do We Perceive Them Quantitatively?

| Type | Attribute |
| :--- | :--- |
| Form | Length |
|  | Width |
|  | Orientation |
|  | Size |
|  | Shape |
|  | Enclosure |
| Color | Hue |
|  | Intensity |
| Position | 2-D Position |

## Do We Perceive Them Quantitatively?

| Type | Attribute | Quantitatively Perceived? |
| :--- | :--- | :--- |
| Form | Length | Yes |
|  | Width | Yes, but limited |
|  | Orientation | No |
|  | Size | Yes, but limited |
|  | Shape | No |
|  | Enclosure | No |
| Color | Hue | No |
|  | Intensity | Yes, but limited |
| Position | 2-D Position | Yes |

## Context Matters

## Context Matters

$\square$

## Calling Attention

Which principle do I use here?

## Gestalt Principles of Visual Perception

- Proximity
- Similarity
- Enclosure
- Closure
- Continuity

These all generate meaning, whether you intend it or not!

## Applying These Principles

- WSJ graph on job openings
- My regression results
- first a set of slides that do a so-so job
- second a set of slides that do a better (but improvable) job

## Similarity and Continuity

Change, $1 / 2018$ to $11 / 2019$

Job openings in blue-collar industries saw some of the weakest growth before the pandemic.

## Similarity and Continuity

Change, $1 / 2018$ to $11 / 2019$

Job openings in blue-collar industries saw some of the weakest growth before the pandemic.

Change, $1 / 2020$ to $11 / 2021$

Now, blue-collar job openings are logging the biggest
y vad gains.

## Baseline Increase of $\$ 7.3$ Million per Mile

additional spending per mile， 1970 onward，$\$ 2016$ millions

Measures of Government Quality Unrelated to Spending Increase

## Baseline

## Has State Env. Protection Act

Land Use Cases per 10k People
Bond Score
Num of Local Governments

additional spending per mile, 1970 onward, $\$ 2016$ millions

Measures of Labor Strength Unrelated to Spending Increase

Land Use Cases per 10k People
Bond Score
Num of Local Governments
Right to Work Law
Share Unionized
Share Voting Dem. Pres. Candidate
0

## Using the Principles of Proximity and Similarity

Using the Principles of Proximity and Similarity

Using the Principles of Proximity and Similarity

Using the Principles of Proximity and Similarity

## Using the Principles of Proximity and Similarity

|  | Baseline |
| :---: | :---: |
| Land Use Law | Land Use Cases per 10k People |
|  | Has State Env. Protection Act |
| Fragmentation Gov't Quality | Num of Local Governments |
|  | Bond Score |
| Labor Strength | Share Unionized |
|  | Right to Work Law |
|  | Share Voting Dem. Pres. Candidate |
| $\underset{\text { Additional spending per mile, }}{0} \stackrel{4}{\$ 2016}$ millions ${ }^{6}$ |  |

R: Merging

## Why Do You Need to Know How to Merge?

If you want to say anything about something in more than one dataset.

## What is a Merge?

You want to put together

Dataset A - One obs/ID

| ID | Income |
| :--- | :--- |
| A 50 |  |

B 100

Dataset B - One obs/ID

| ID | Pool |
| :--- | :--- |
| A | TRUE |

B FALSE

## What is a Merge?

You want to put together

Dataset A - One obs/ID

| ID | Income |
| :--- | :--- |
| A 50 |  |

B 100

Dataset B - One obs/ID

| ID | Pool |
| :--- | :--- |
| A | TRUE |

B FALSE
Into

| ID | Income | Pool |
| :--- | :--- | :--- |
| A | 50 | TRUE |

B 100 FALSE
This is a 1 to 1 merge.

## What is a Many to 1 Merge?

You want to put together
Dataset A - One obs/ID

| ID | Income |
| :--- | :--- |
| A | 50 |
| B | 100 |

Dataset B - many obs/ID

| ID | Pool | Year |
| :--- | :--- | :--- |
| A | TRUE | 2020 |
| B | FALSE | 2020 |
| A | TRUE | 2021 |
| B | TRUE | 2021 |

## What is a Many to 1 Merge?

You want to put together
Dataset A - One obs/ID

| ID | Income |
| :--- | :--- |
| A | 50 |
| B | 100 |

Dataset B - many obs/ID

| ID | Pool | Year |
| :--- | :--- | :--- |
| A | TRUE | 2020 |
| B | FALSE | 2020 |
| A | TRUE | 2021 |
| B | TRUE | 2021 |

How many rows should it have?

## What is a Many to 1 Merge?

You want to put together
Dataset B - many obs/ID
Dataset A - One obs/ID

| ID | Income |
| :--- | :--- |
| A | 50 |
| B | 100 |

| ID | Pool | Year |
| :---: | :---: | :---: |
| A | TRUE | 2020 |

B FALSE 2020
A TRUE 2021
B TRUE 2021

| ID | Pool | Year | Income |
| :--- | :--- | :--- | :--- |
| A | TRUE | 2020 | 50 |

How many rows should it have?
B FALSE 2020100
A TRUE 202150
B TRUE 2021100

What is a Many to Many Merge?

A mess!

## What is a Many to Many Merge?

A mess!
Dataset A

| ID | Income |
| :--- | :--- |
| A | 50 |
| A | 60 |
| B | 100 |

Dataset B

| ID | Pool | Year |
| :--- | :--- | :--- |
| A | TRUE | 2020 |

B FALSE 2020
A TRUE 2021
B TRUE 2021

What is a Many to Many Merge?

## A mess!

Dataset A

| ID | Income |
| :--- | :--- |
| A | 50 |
| A | 60 |
| B | 100 |

Dataset B

| ID | Pool | Year |
| :--- | :--- | :--- |
| A | TRUE | 2020 |

B FALSE 2020
A TRUE 2021
B TRUE 20212021

There is no logical path to merge $A$ and $B$.

What is a Many to Many Merge?

## A mess!

| Dataset A |  |
| :--- | :--- |
| ID | Income |
| A | 50 |
| A | 60 |
| B | 100 |

Dataset B

| ID | Pool | Year |
| :--- | :--- | :--- |
| A | TRUE | 2020 |

B FALSE 2020
A TRUE 2021
B TRUE 2021
There is no logical path to merge $A$ and $B$. Probably something is wrong with $A$.

## Merging in R

## Try Today's Tutorial

- Make a .R script for whole tutorial
- Plus questions at end
- Go forth!
- I will be here till 5:20 - please stay and ask questions

## Next Lecture

- Turn in PS 2
- Read Few Chapter 9 and Chapter 10, pages 210-217 (on bars)
- Read Chang, Chapter 3
- Read two linked examples from WSJ
- Turn in policy brief proposal
